

MINI-WORKSHOPS: YES, YOU CAN CALCULATE YOUR MIDTERM COURSE GRADES

Do you know your current grade in each class? Can you figure out what your best (or worst) possible grade is given the scores you currently have? You can do figure out whether you have to do extra credit to get the grade you need—in less time than the actual extra credit assignment takes. We show you how to do the math! Even if you hate math, you can do it! We will also show you how to calculate your current and cumulative GPAs.

Bring your syllabi and your grades up to now in the course you're concerned about. Don't worry, we won't make you show them.

30-minute small group sessions:

Wed. (C105 Wonders) 3:00 to 7:00 pm, 1 session per ½ hour

Thr. (334A Case) 5:00 to 8:00pm, 1 session per ½ hour.
